

1300 New HS Seats Post-Its (March 30)

CAREER CENTER

STRENGTHS	CHALLENGES	Other
Seems to balance HS locations better- putting something in SE quadrant	Limited space (repeated most often)	Could a HS Expeditionary Learning Program be here?
Centrally located (repeated most often)	Green space? Lots of different programs on this one site	Could it be a second HB?
Good location serving neighborhoods that a predicted to grow	Lack of green space	Before deciding, compare demand for Arl Tech/Immersion/IB – whatever has highest demand should be what is decided
Good dispersion of HS facilities/equity across county/enables walking option	So much on one site – where will staff park? (repeated)	Build a STEM Focus to accompany Arl Tech
Site has great potential for improvement (repeated)	No pool or parking or fields (repeated)	Will Arl Tech be a lottery school?
Has room for neighborhood comprehensive HS	Only really adding 500 seats – majority will be Tech Center	Change name of Arl Tech!
Good location – just include ARTS	Does it have potential to expand into 2000+? Really need full comprehensive neighborhood school here	Can Career Center students become the full-time students at this new HS to reduce transportation and combine use of building
Can accommodate expansion of Tech Program	Where would Montessori move?	Only one new HS?
Good to have new 4th comprehensive with a focus like Arl Tech	Career Center is a dump – will APS invest to improve it with windows, etc?	Use roof or middle floors for covered track/sports
Will it fit if we move Henry?		
Can use Wakefield & WL for extra-curricular needs		
Already a building in place that can expand or torn down and redesigned		
2nd most desirable for transportation but least for field space		
Career Center is 2nd most desirable from transportation perspective; however has least opportunity for field space	Career Center building is a dump- will APS allocate enough money to make it nice?(i.e. add windows?)	Could a HS EL program be located here?
Best choice if actual building is expanded upon, or down and rebuilt much larger and redesigned to accommodate all programs	We need a 2K HS that is comprehensive (perhaps with a football field)	Use roof or middle floors for covered track, sports, etc./ kids need that!
Already a building in place with a HS program	It seems unfair to require going to a 2nd neighborhood school that is not optional	Will there be more than one new HS built or just one due to budgeting restrictions?
South Arlington traditional school, can use Wakefield and WL for extracurricular	Lack of field space	Can you have the students who go to the career center, become students at this new HS, to reduce the use for this space
I love having a comprehensive high school at Arlington Tech! Will it fit if we move Henry?	Where would they move Montessori if build there(because moving to old Patrick Henry)	Change name of Arlington Tech.
Nice to have a new 4th high school with a focus(Like Arlington Tech)	Does it have potential to grow bigger, into a full comprehensive HS with fields location nearby?	Will Arlington Tech be lottery or test based?
Expansion of Tech program	You really need a neighborhood HS in this area	
This is a great option given needs in 21st century- just include the Arts!	Pool or sports facilities	
Makes room for a neighborhood school- comprehensive	Only adding 500 HS seats with majority as Tech Center	
Site has great potential for Improvement!	4 schools on one site? And a library? That is so much- where will staff park?	
Good dispersion of HS facilities	Green space?	
Equity access county	Lots of different programs going on, on this site	

1300 New HS Seats Post-Its (March 30)

CAREER CENTER

STRENGTHS	CHALLENGES	Other
Enables walking option	Limited space (smaller than other 2 options)	
It seems like this would be a good location in terms of serving neighborhoods that are predicted to grow	Close to Patrick Henry Elem. School	
Career Center site seems to balance HS locations better-puts something in the SE quadrant		
Centrally located
