

### 1300 New HS Seats Post-Its (March 30)

KENMORE		
STRENGTHS	CHALLENGES	Other
Central location (repeated)	Not walkable / dangerous for biking/traffic problems (repeated most often))	What about Edison site swap?
Fine if it is less than 1300 seats	HS next to elementary school	Need to provide extra-curricular activities and field space
Better space for an addition (repeated)	At very edge of county – not central (repeated)	Would students here go to other schools to swim, etc?
Room for neighborhood/comprehensive HS (repeated)	Neighborhood resistance	Is there student population growth in this area?
Flexibility to do 1300 now then grow to full comprehensive HS and move Kenmore (maybe to Hospital property on Carlin Springs Rd) (repeated)	1300 seat school won't have equitable amenities (Repeated)	Would have to be option school since no fields, etc
Lots of field space	Loss of current field space if building expanded (repeated)	Wouldn't have equitable opportunities to full HS
Option to build over Rte 50 for parking and to create space	Concern about diversity issues	What is VA Hospital Center land being used for?
Remember traffic will be bad in all three locations so shouldn't eliminate option	Noise and parking	Need to plan not to keep at 1300 or else other HS too much over capacity
Gives the most flexibility for future growth (repeated)	Not likely to allow for IB expansion on this site	Could this site be full HS with pool, fields, etc if Kenmore moves?
Central location to absorb all capacity issues	Proximity to an Elementary school and middle school	Would like to see the pool as portion of the HS design option
Less stress on resources than adding to another HS campus would accommodate it's own teams, art, etc.	Land is at the edge of the county	Could this be a full site with pool etc. if middle school was moved?
Space to a bigger school	If they want an IB program expansion, may not get approved	The plan to not keep the HS over capacity as just 1300 seats, keeps APS HS over capacity
Make Kenmore a HS growth is projected to continue and our CHS will be way over capacity room. This gives us the most options	Concern about the noise in neighborhood	What is the Virginia Hospital land being needed for?
Only site that has the potential to be expanded into a full fourth comprehensive HS	Diversity issues need to be addressed in a comprehensive way, before any other comprehensive school is constituted	All high schools need to offer the same "amenities"- if not possible, then not an option!
Traffic is bad everywhere, at all 3 locations under consideration	We need a 2K HS that is comprehensive (perhaps with a foot ball field)	Is this the site near the future student population growth? It's near small homes, or small lots
Kenmore would allow for expansion to largen HS, if we get the Carlin Springs property of middle school	Smaller high school with less options may not be appealing to families and students	Can't be comprehensive its w/a boundary without fields- would have to be, at least temporarily, an option school
Lots of field space option to expand over RT 50 for parking, and "create" land	Loss of fields, loss of parking, loss of green space	Is there student population growth here?
Good dispersion of HS seats throughout county	Would lose fields for the sports	Would students be able to go to other high schools for swim, etc., if the Kenmore facilities were smaller then other three high schools?(e.g. no pool)
I like this option, because it allows eventually a big comprehensive HS here. If Kenmore MS moves to VHC property and allows field space	No field space for after school sports and outdoor activities, which is the top priority for HS	HS:sports, fields, extra need to provided
Flexibility to build 1300 now then grow to 4th comprehensive HS by adding Kenmore space and moving Kenmore to new site	If they have to share field space with other schools, HS and MS students may opt. out of sports and activities	What about Edison Swap site?
Centrally located for Hs site so could draw boundary easily	1 High school would not have the equitable amenities	
Makes room for a neighborhood school/comprehensive HS	Neighborhood designed -need to make it possible for students zoned to 1300 neighborhood schools to participate in extra-curricular activities	

**1300 New HS Seats Post-Its (March 30)**

**KENMORE**

<b>STRENGTHS</b>	<b>CHALLENGES</b>	<b>Other</b>
Kenmore seems to have better space for an addition, and to handle capacity traffic, sports	W-L is the most popular high school for a lot of reasons. Folks need to accept that they cannot have their cake and eat it too(green space). People move to those neighborhoods in groups due to the fabulous elem. Then they complain about it. Traitors! Come to Carlin Springs and then enjoy the woods!	
Love the Kenmore site. Would like to explore public transportation to this site	Kenmore challenges neighborhood opposition, traffic issues with proximity to commuter traffic and 3 levels of school at 1 site(ES, MS, HS)	
Make it >1300 seats	Very edge of the county uses more bussing	
Central location in county	Traffic safety for elem. Students(both traffic and howling HS age students around)	
Central location	Decreasing field/recreational space	
	Proximity to elementary schools	
	Would be a traffic solution by broad impact park land and neighborhood	
	Traffic and safety of walkers	
	Traffic on Carlin Springs	
	Carlin Springs already has school/traffic challenges- would worsen	
	Traffic already is a problem	
	Traffic would be a big challenge for the Kenmore site	
	Kenmore as a HS site presents the most sufficiency. It forms a transportation and logistics stand point	
	Not walkable to almost all(current Kenmore kids take Art buses)	
	Dangerous traffic, no biking option, and a high school next to the elementary school
