

# NEW ELEMENTARY SCHOOL

REED SITE, ARLINGTON PUBLIC SCHOOLS

CONCEPT DESIGN

VMDO

# **BLPC + PFRC JOINT MEETING**

BUILDING LEVEL PLANNING COMMITTEE  
PUBLIC FACILITIES REVIEW COMMITTEE

- 1. Welcome / Opening remarks**
- 2. Updates**
- 3. County Staff Presentation**
- 4. Transportation and Parking**
  - a. APS GO! Survey**
  - b. Pedestrian Access**
  - c. Parking Demand**
  - d. Parent Pick-up/Drop-off**
- 5. BLPC/PFRC Discussion**
- 6. Public Comments**
- 7. Next Steps & Adjourn**

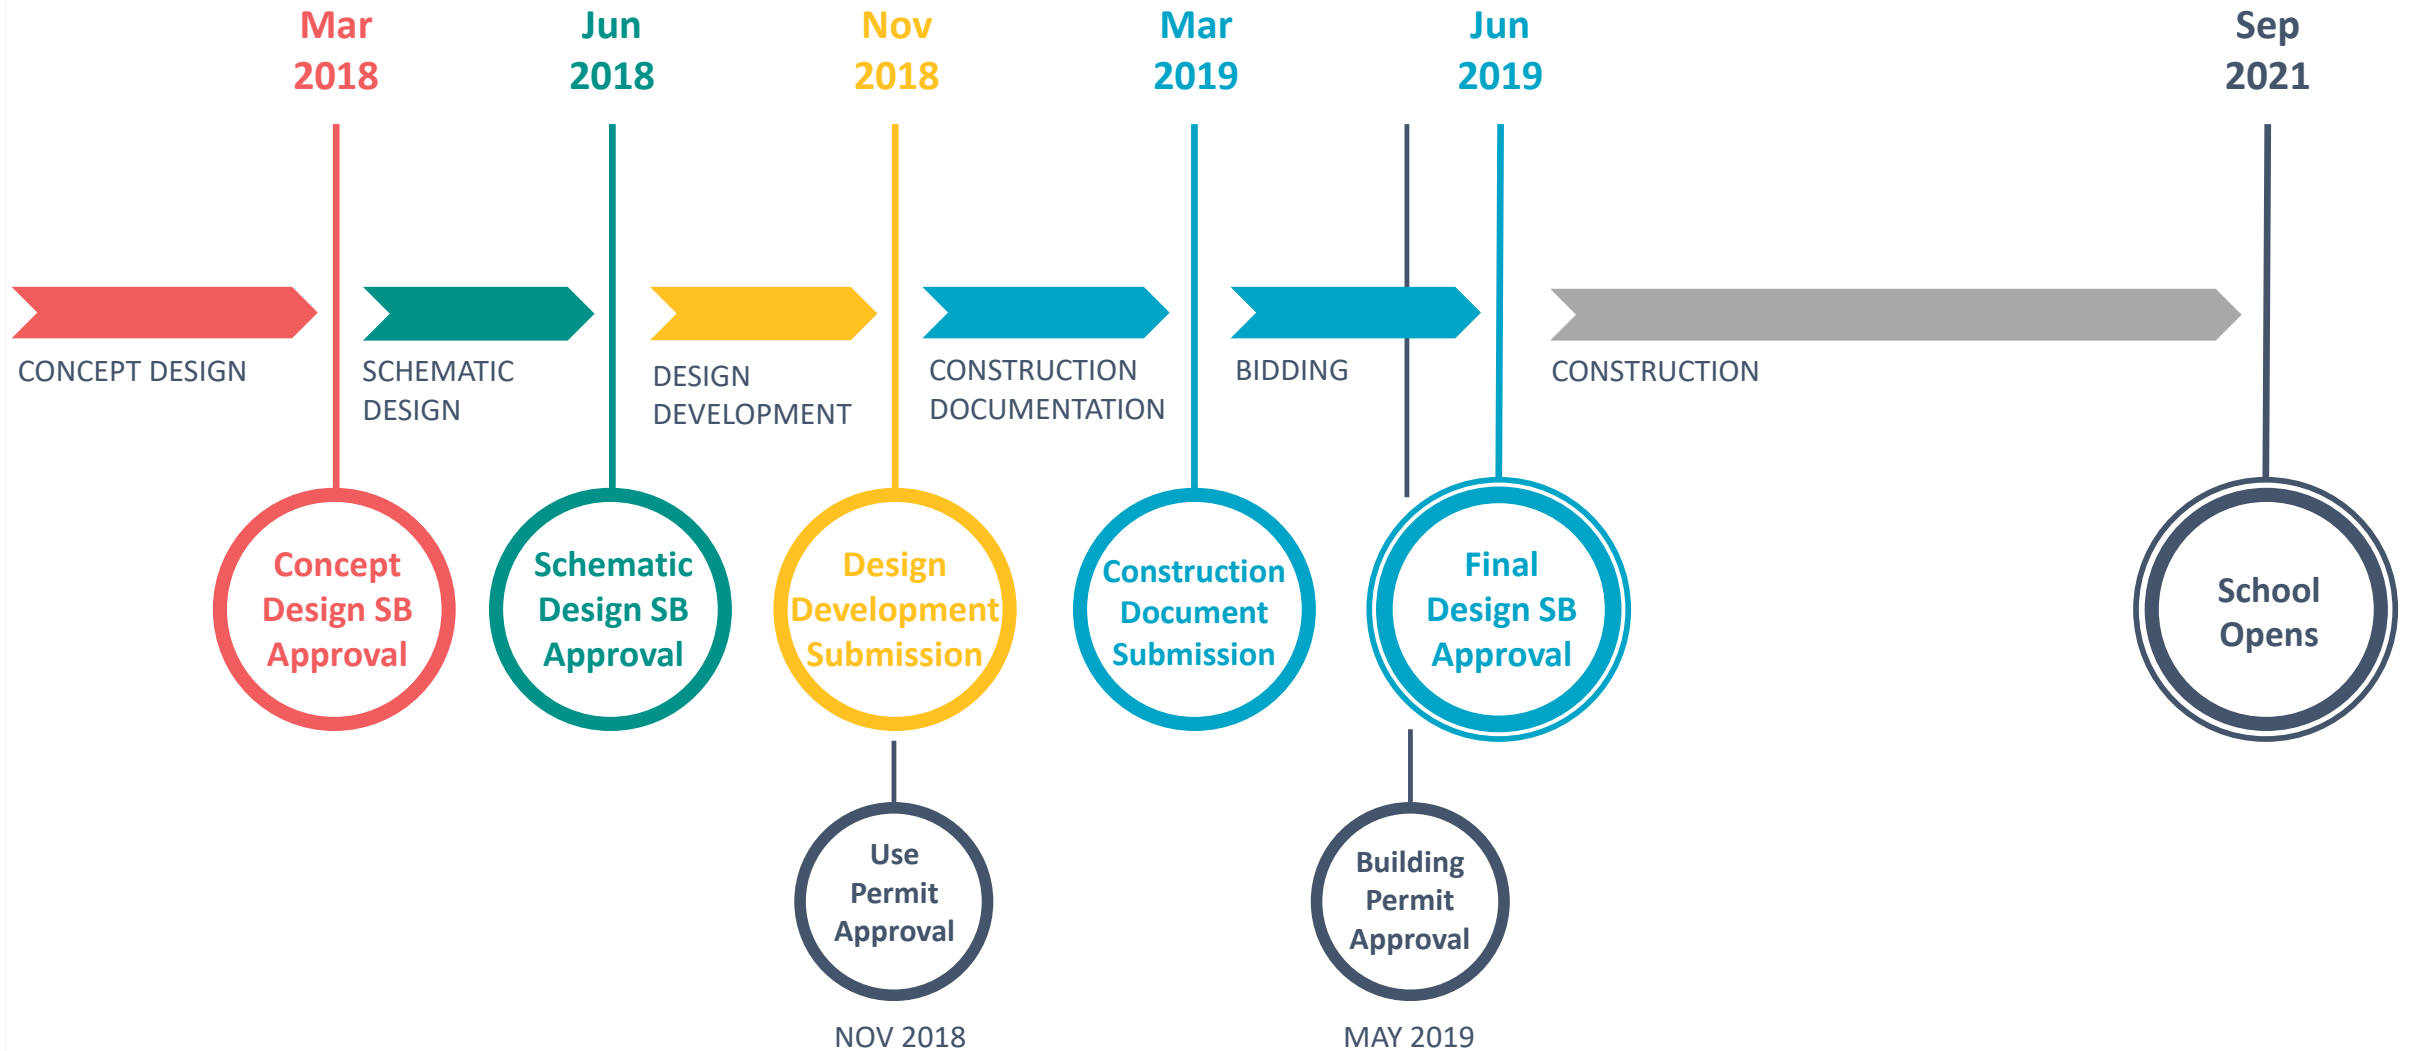

# WELCOME / OPENING REMARKS

# PROJECT PARAMETERS

1. Create a **new neighborhood elementary school** with an attendance zone
2. Support APS Strategic Plan Goals, specifically **Goal #4 – Provide Optimal Learning Environments**
3. Address capacity by providing at least **725 seats**
4. Open by start of school **2021**
5. Spend a maximum project cost **\$49 million, with options for less**

# UPDATES

## SINCE WE LAST MET...

- February 9<sup>th</sup> – School Board Committee of the Whole Meeting
- February 15<sup>th</sup> – School Board approved Construction Manager at-Risk (CMR) contract award to Gilbane Building Company
- Ongoing activities:
  - Concept Design phase cost estimates
  - Concept Design report for School Board
  - Transportation Study

# COUNTY STAFF PRESENTATION

# REED SCHOOL UPDATE

FEBRUARY 21, 2018

ARLINGTON  
VIRGINIA

# SITE PARKING CONSIDERATIONS

1

Library parking on-site

2

All APS parking on-site

3

Maintain existing site amenities

# LIBRARY PARKING

- Zoning ordinance requirement
  - 1 space per 500 square feet of floor area
- Library has 9 full-time staff
  - 33 spaces marked reserved for library staff
- Average 79 new visitors per hour
  - Peak weekdays 10am-12pm  
Thursday & Friday story time

# REED PROJECT

- Adjusted based on actual needs
  - Adjusted based on TDM
    - Swanson/APS Go data
  - All parking to be provided on-site\*
  - Preserve on-street parking in the vicinity for retail and library use (as it exists today)
- 

# SCHOOL PARKING: ZONING ORDINANCE SECTION §14.3.7

Parking Calculations for Reed Site - School			
<b>ZO Requirement for Employee Parking</b>			
	Employee Parking Ratio	Number of Students	Required Parking Spaces
Elementary Employees	1 Space per 7.5 Students	725	97
Elementary Employees	1 Space per 7.5 Students	1,000	134
<b>ZO Requirement for Visitors Parking</b>			
	Visitor Parking Ratio	Number of Students	Required Parking Spaces
Elementary Visitors	1 Space per 40 Students	725	19
		1,000	25
<b>TOTAL Elementary Requirements</b>		725 Students	116
		1,000 Students	159
	Library Parking Ratio	Floor Area	Required Parking Spaces
Library Parking	1 Space/500 sq. ft. floor area	16,403 sq. ft.	33
<b>Total ZO Required Parking Elementary + Library</b>			
		725 Students	149
		1,000 Students	192

# SCHOOL PARKING : MODIFICATION

Section §14.3.7.c of the Zoning Ordinance permits the County Board to modify parking requirements for schools to balance other County environmental and recreational goals and objectives.

# SITE AMENITIES

- Maintain existing sport fields/courts
  - Middle school baseball field
  - (2) basketball courts
  - Soccer field
- Maintain County property
  - Green Space
  - Champion Tree

# NEXT STEPS

Transportation study

School/library/retail coordination

VDOT coordination

# TRANSPORTATION AND PARKING

# TRANSPORTATION SCHEDULE

## Overall Schedule

**March 8<sup>th</sup>**

Information Item to School Board

**March 22<sup>nd</sup>**

Action Item to School Board

**April through June**

Schematic Design

## Transportation Schedule

**January 24<sup>th</sup>**

Finalized Scoping Agreement

**February 8<sup>th</sup>**

Traffic Data Collection

**February 21<sup>st</sup>**

BLPC/PFRC Transportation Meeting

**March 21<sup>st</sup>**

BLPC/PFRC Transportation Meeting

**Late April**

Draft Transportation Report Released

**May & June**

Transportation Report Comments and Revisions

**After Schematic Design**

TDM, Parking and Arrival/Dismissal Plans

# TOPICS

## **MEETING 1: 02-21-2018**

**APS Go! Survey data**  
What is it telling us?

**Pedestrian access and walking routes**  
How can we improve and expand the walk zone?

**Parking demand**  
Estimates and thoughts on supply needs

**Parent drop-off and pick-up**  
Estimates and thoughts on accommodations and operations

## **MEETING 2: 03-21-2018 (PRELIMINARY)**

**Vehicular traffic to/from school**  
How much and when?

**Traffic capacity at nearby intersections**  
Implications on school access

**School buses**  
Initial thoughts on routing and maneuvering

**Potential Improvements**  
Roadway geometry & operations

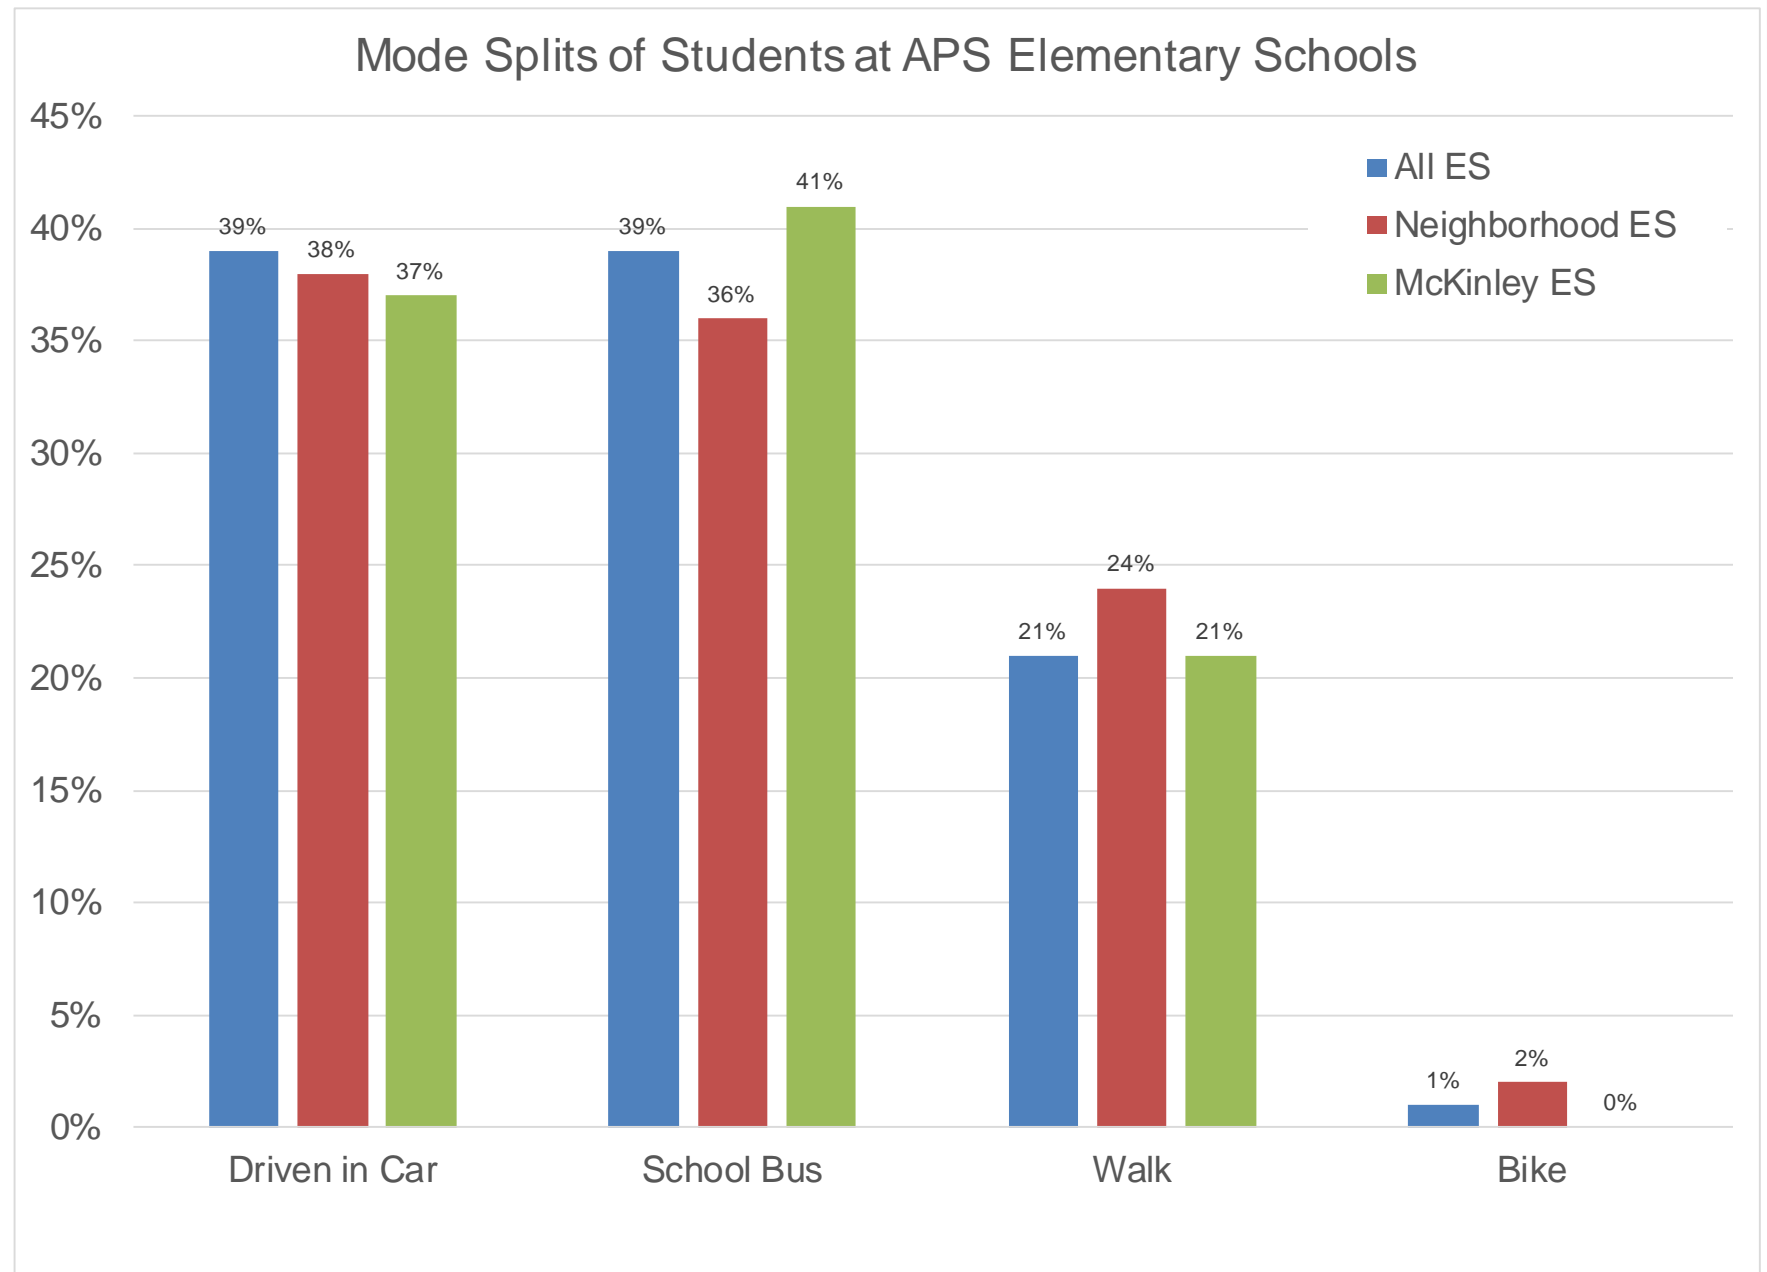

**Responses to comments from Meeting #1**

# APS GO! SURVEY DATA

# STUDENT MODE SPLIT

Mode Split data for Elementary schools is pretty consistent between neighborhood serving schools

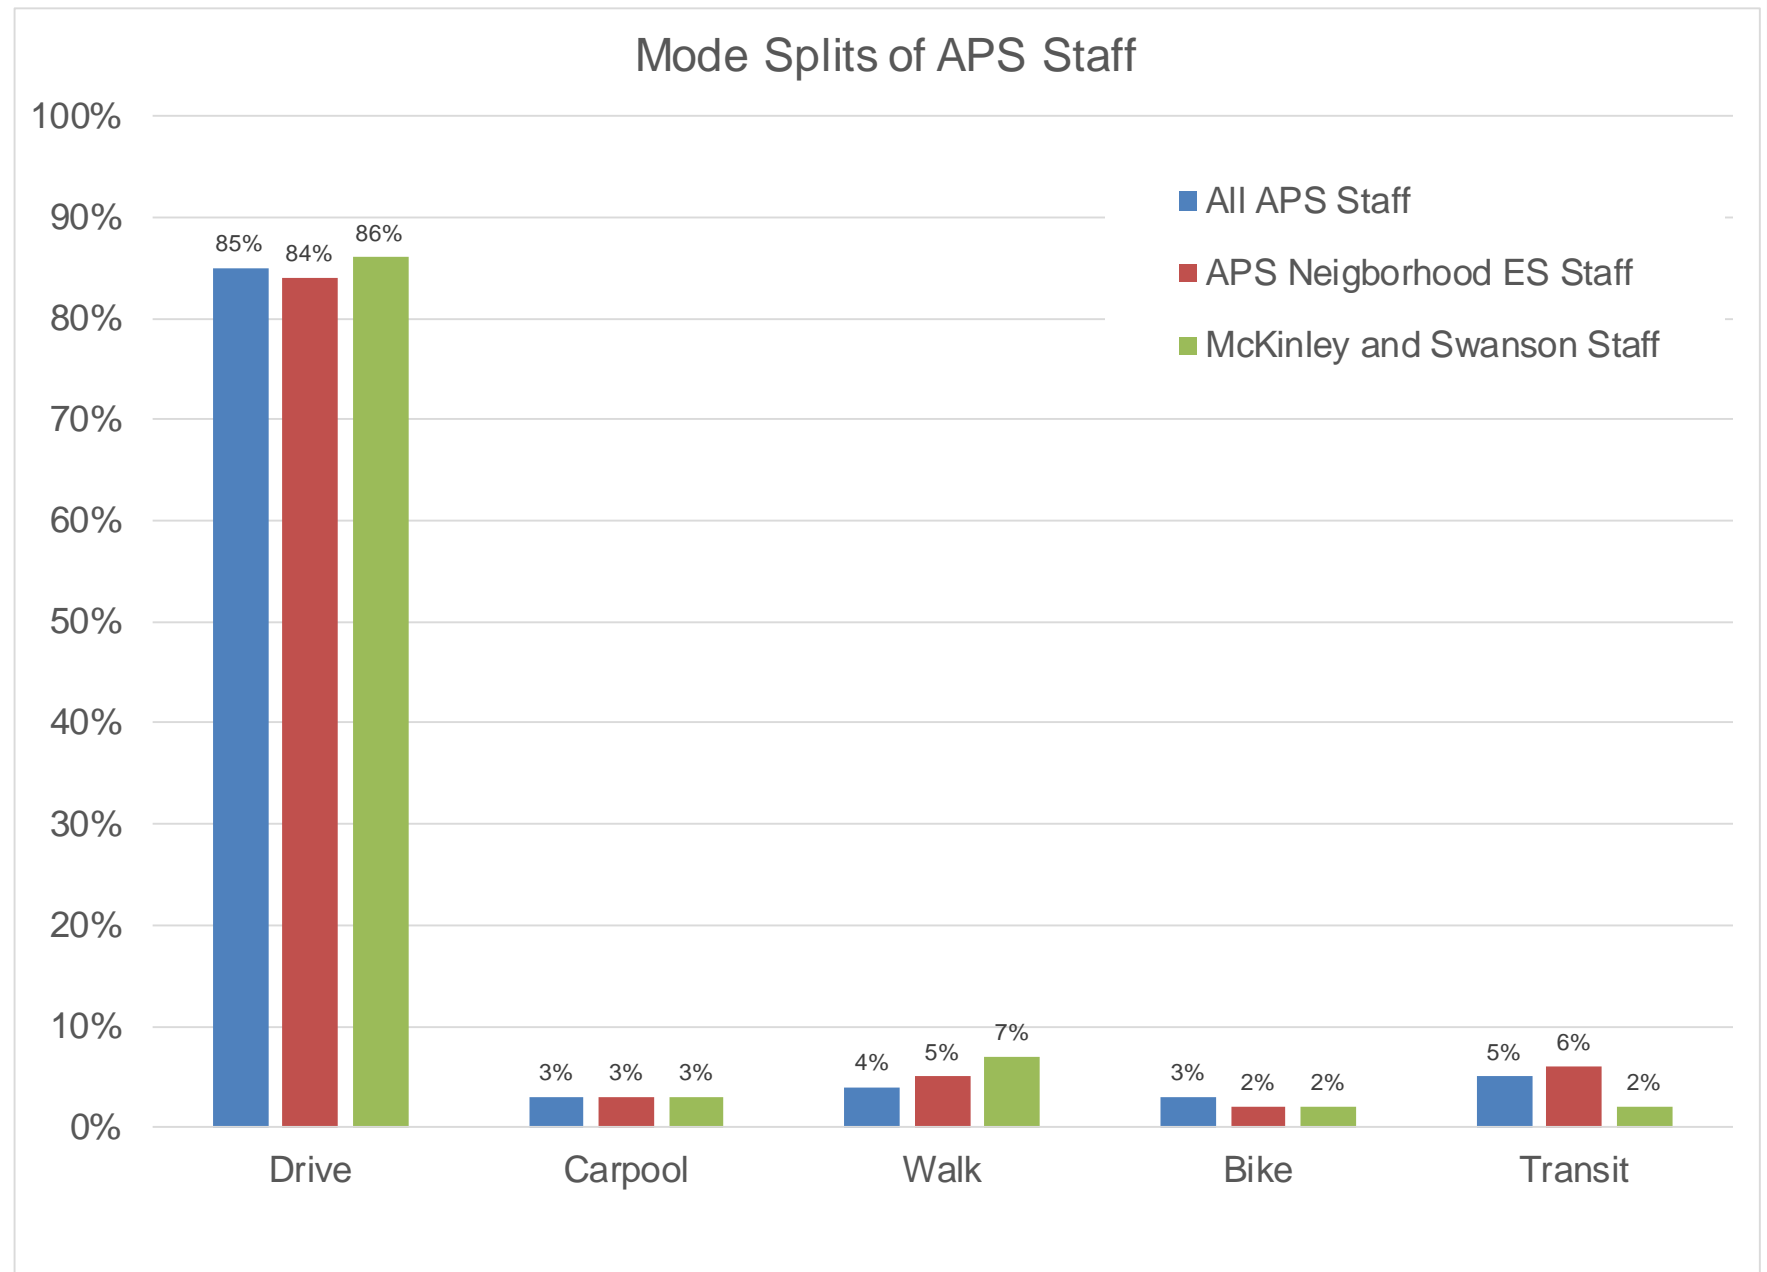

# STAFF MODE SPLIT

Mode Split data for staff is also pretty consistent across schools.

Nearby schools have higher percentage walking, but fewer transit riders.

APS Go! data from 2013 showed a APS-wide staff mode split of 93% drive-alone, compared to 84% in the 2016 surveys.

# PEDESTRIAN ACCESS

# PEDESTRIAN ACCESS & WALK ZONE

APS policies

Review of walking route quality

Potential improvements to expand/enhance walk zone

# System Level Mode of Access By Distance

2016 Travel Mode By Distance - Elementary

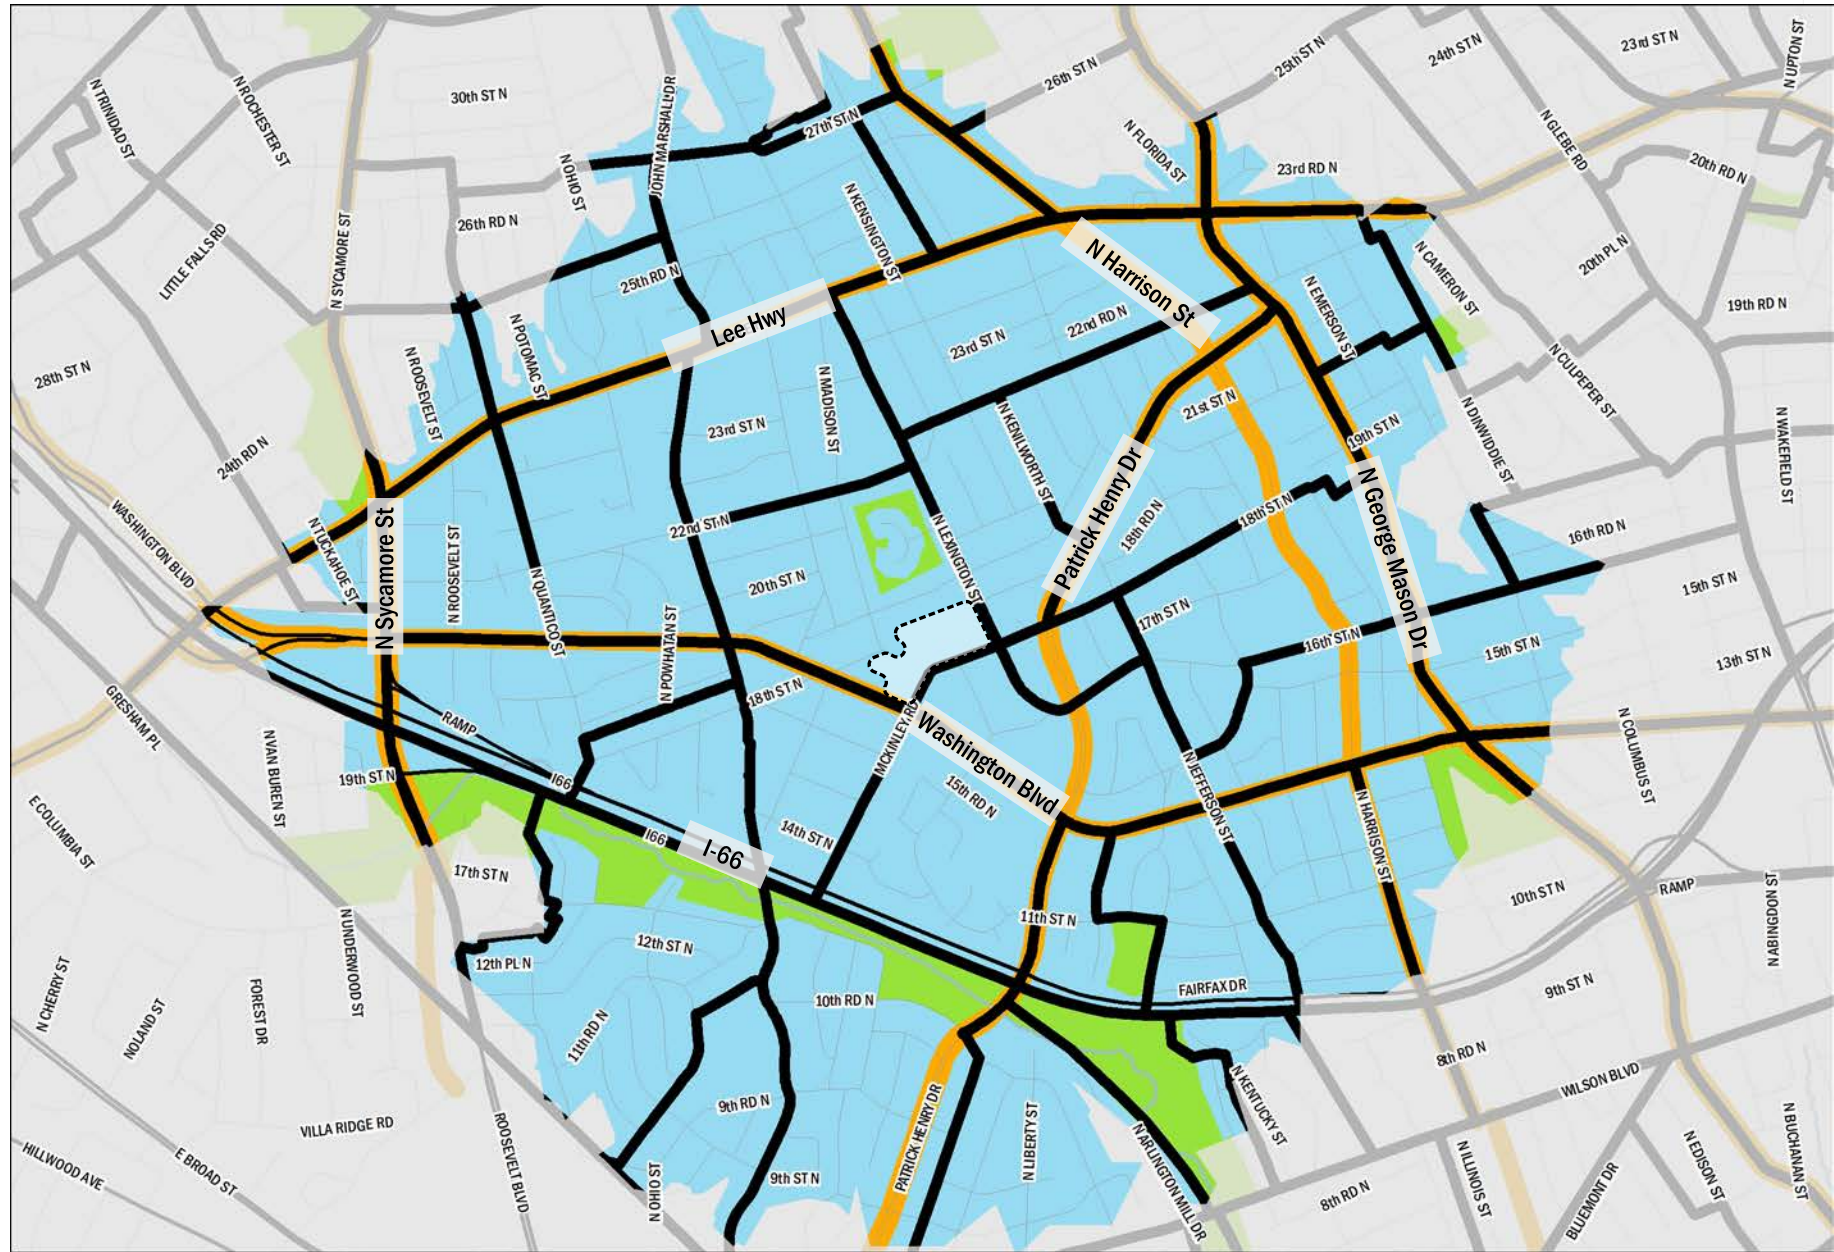

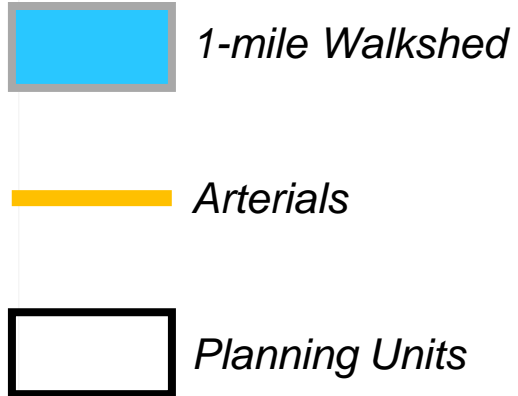

# PLANNING UNITS

Building blocks of school boundaries, and thus also of walk zones

Only PUs fully within the one-mile network can be included in the walk zone

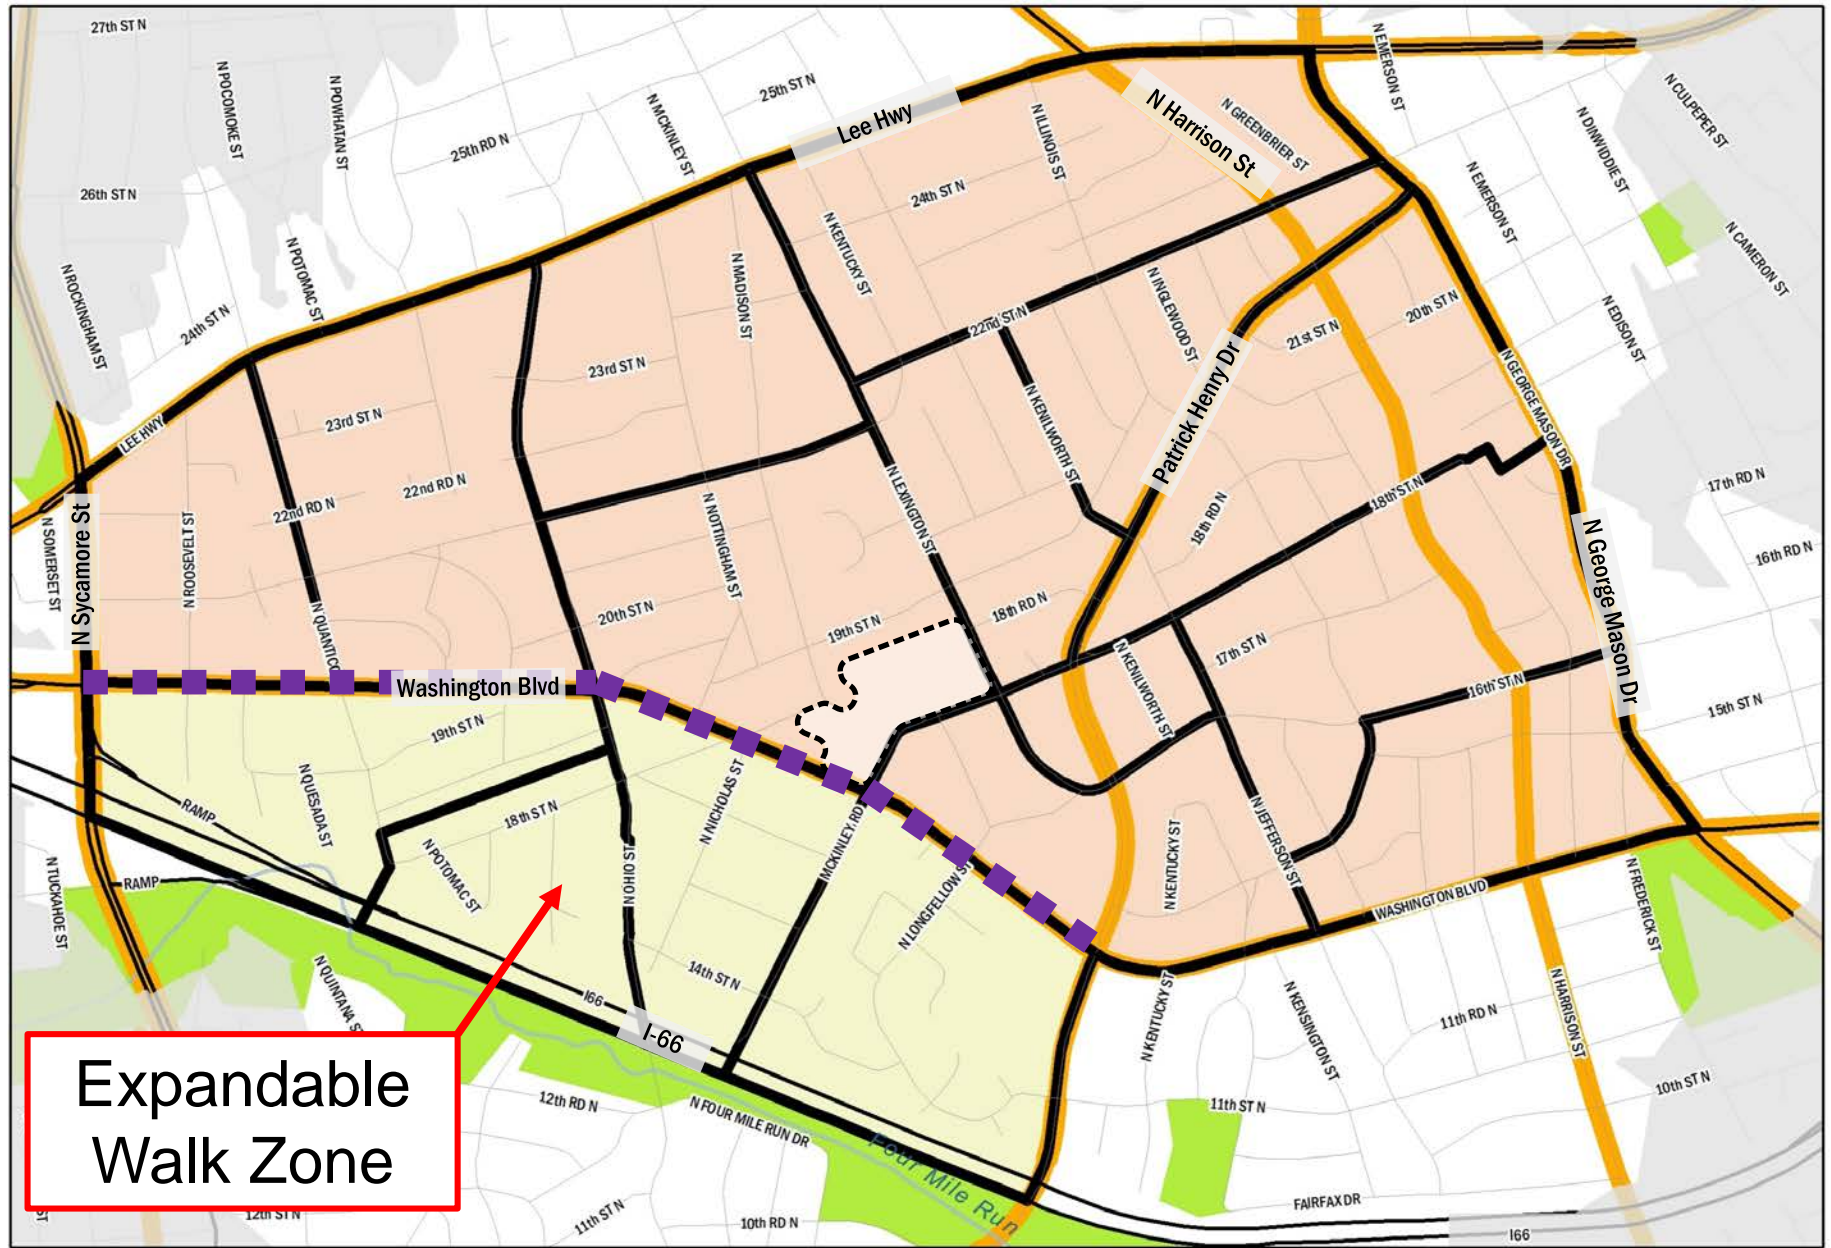

# EXPANDABLE WALKZONE

Planning Units within the one-mile walk, near the school, but with barriers in between. Potentially walkable with additional safety measures.

# WALK SHED ANALYSIS

The following is a walk shed analysis of the potential new ES walk zone.

The walk shed analysis is a review of the quality of the walking experience for each Planning Unit that can potentially be included in the walk zone

## **Considerations in walk shed analysis:**

### Sidewalks

- What's the sidewalk coverage in the PU?
- What's the sidewalk coverage on the entire walking route (between PU and site)
- How many blocks just have sidewalks on one side of the street?

### Crossings

- What are the potential difficult crossings on walking routes from PUs?
- How easy would difficult crossing be to mitigate?

# SIDEWALK COVERAGE

Large variation in sidewalk coverage in Planning Units

**A** - % Sidewalk on Both Sides of Street

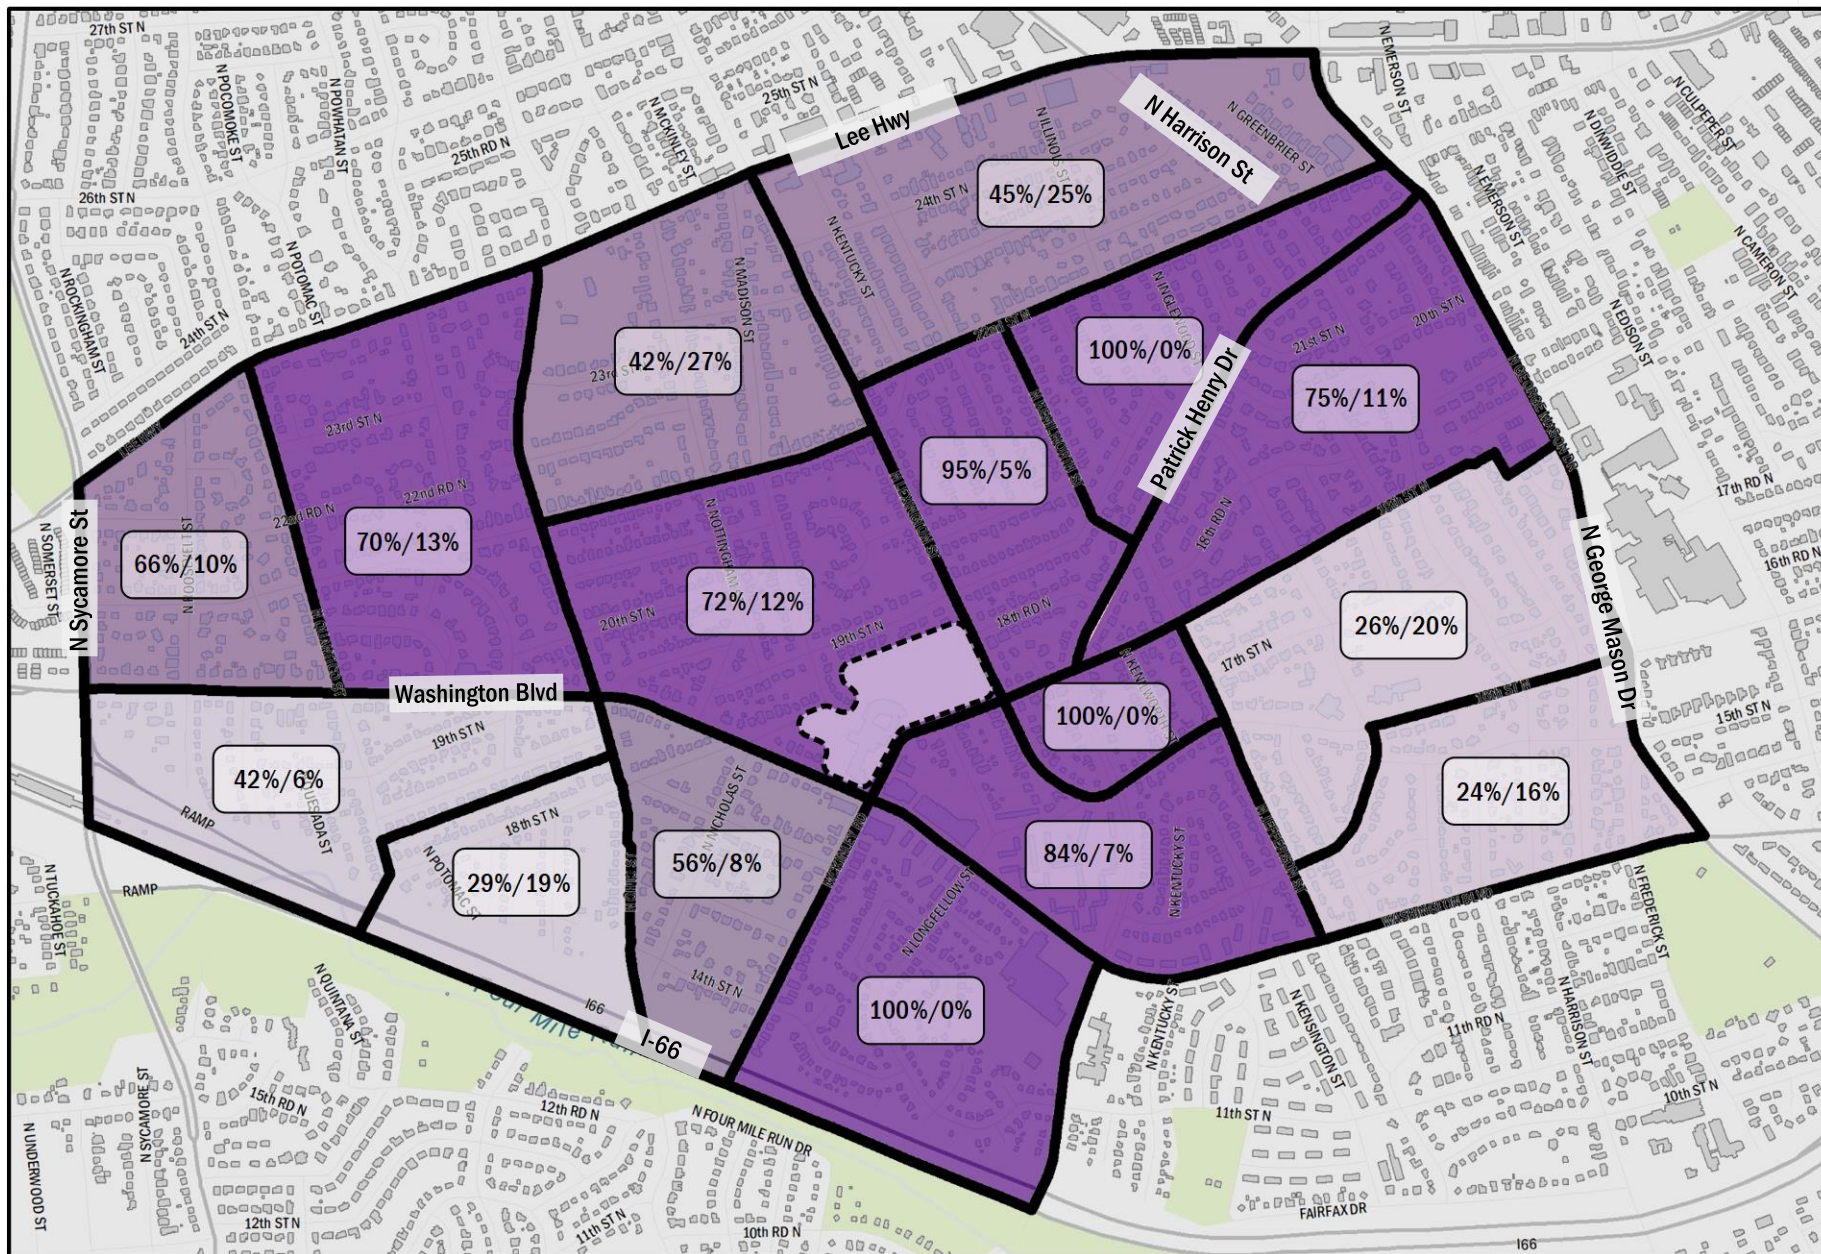

**A% / B%**

**B** - % Sidewalk on One Side of Street

**Over 80% coverage**

**50% to 80% coverage**

**Under 50% coverage**

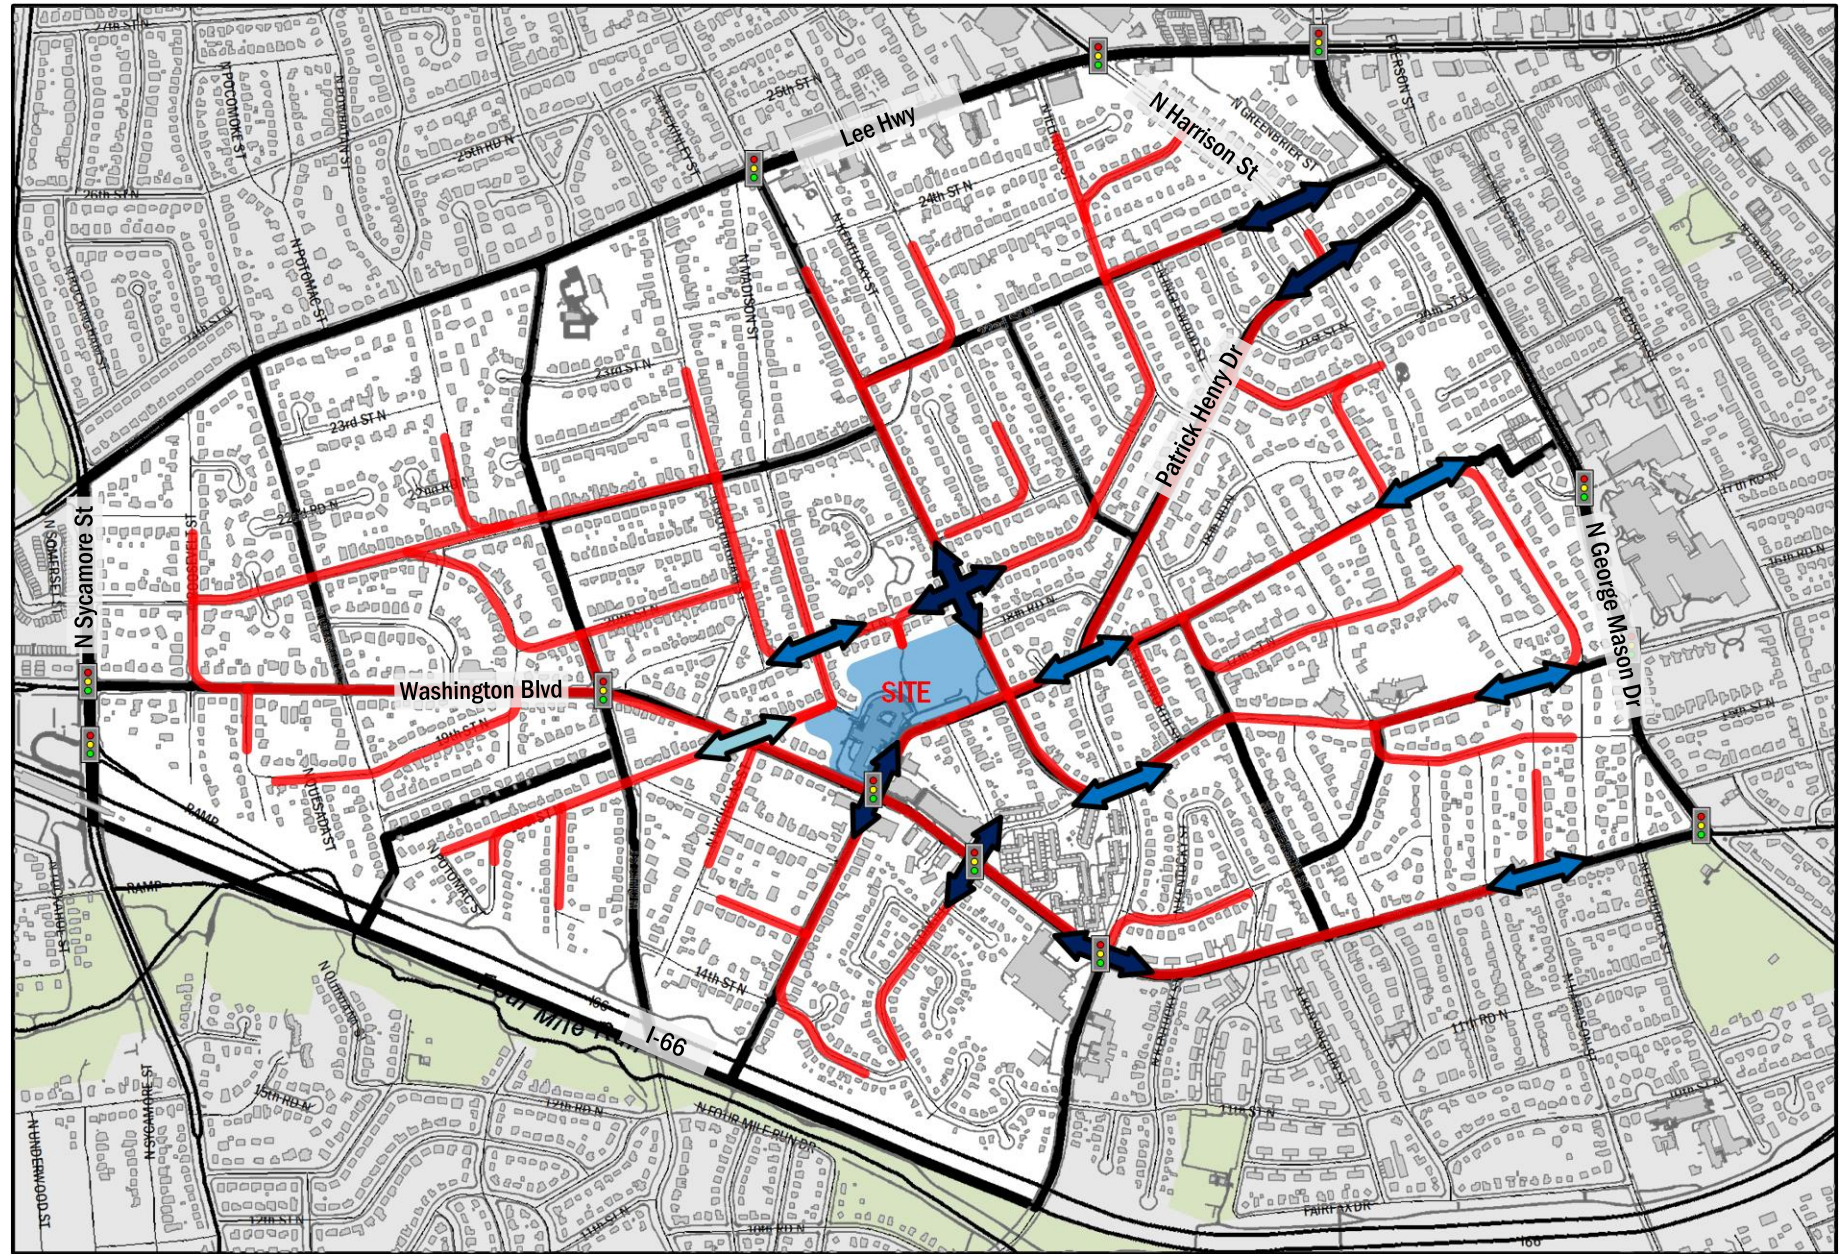

# CROSSING QUALITY

A review of the quality of crossing at arterials and other significant streets

-  Acceptable
  - signalized
  - minimal crossing distance
-  Acceptable w/ Improv.
  - adding crossing guards
  - intersection improvements
-  Req. Significant Improv.
  - unsignalized
  - large crossing distance
  - would require substantial mitigation

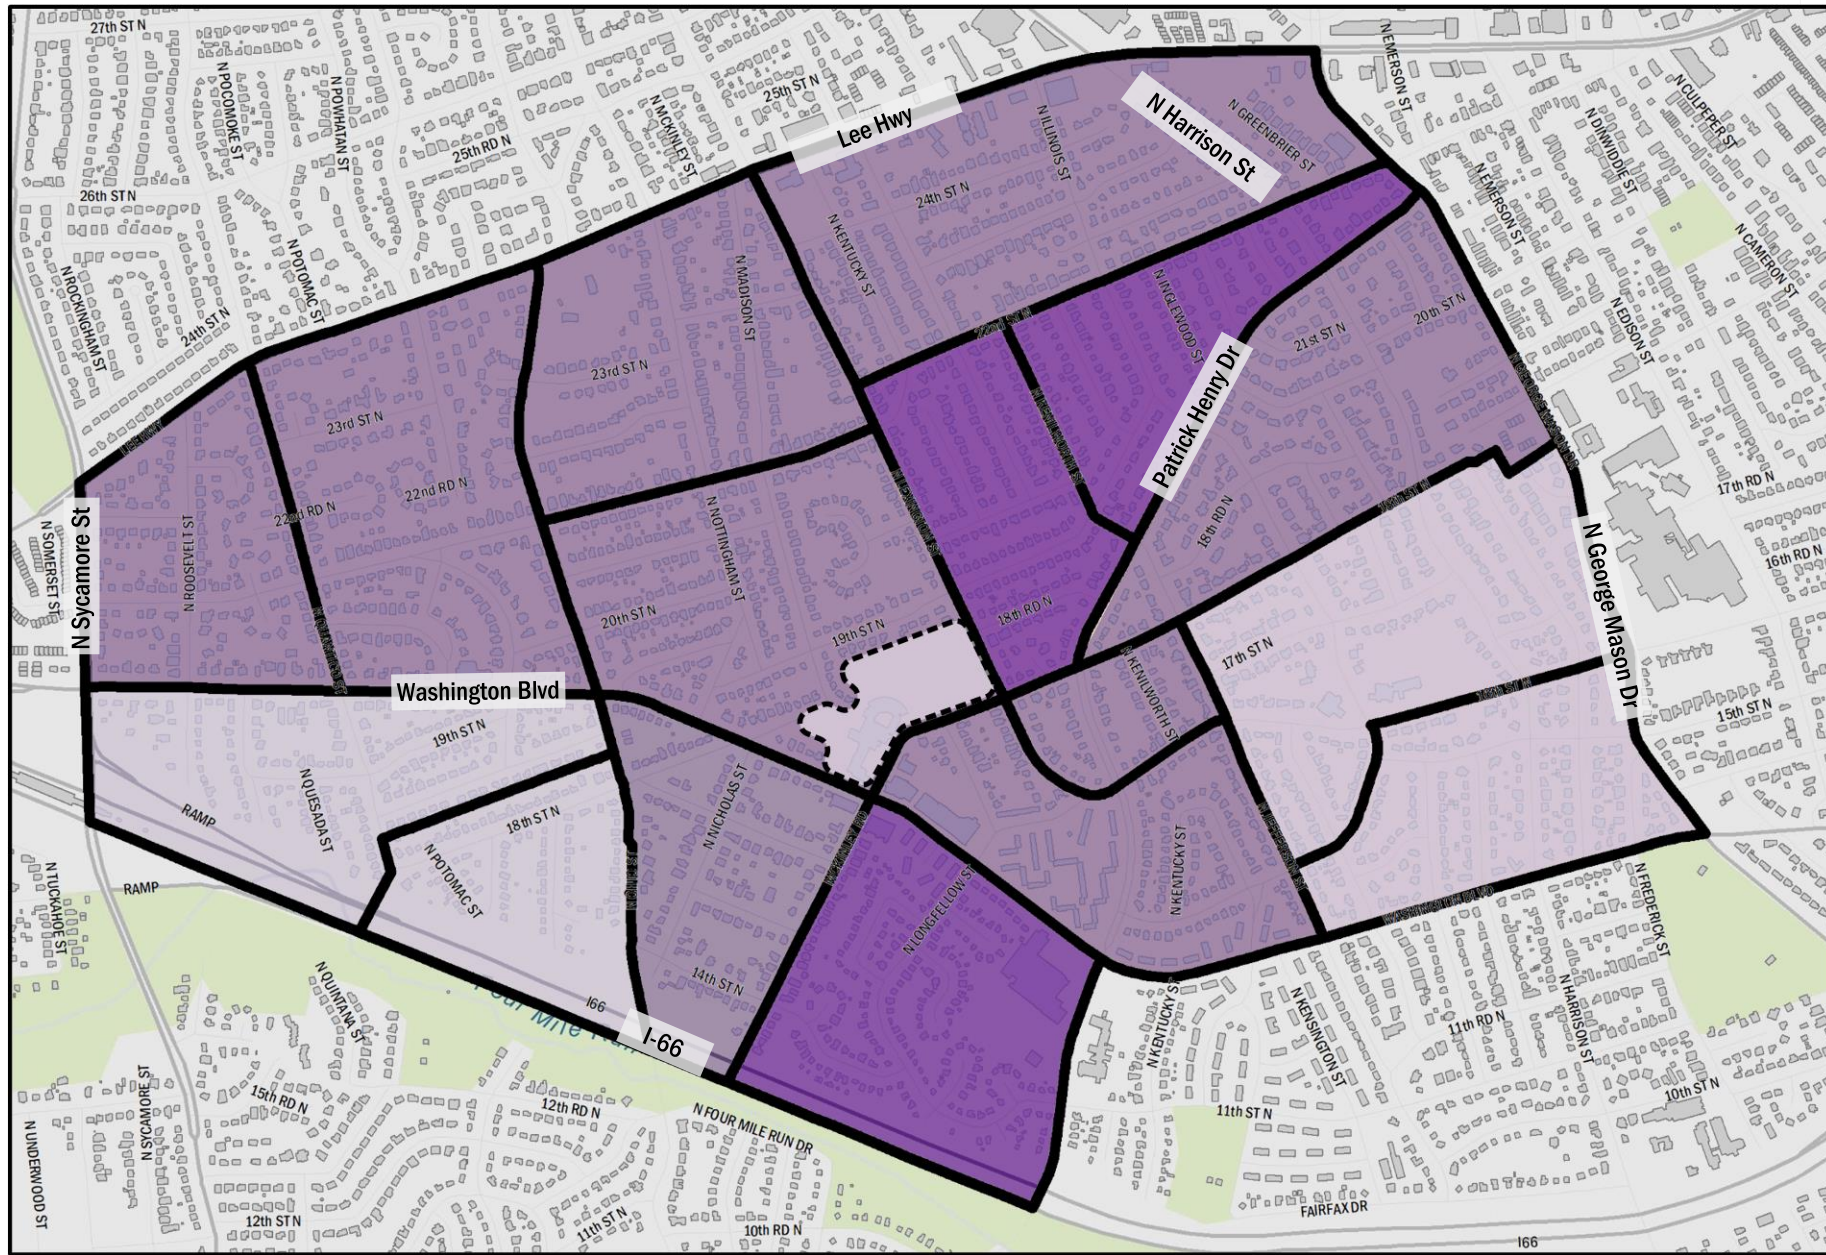

# COMBINED "GRADE"

The gaps in sidewalks will prove a challenge in establishing high quality walking routes

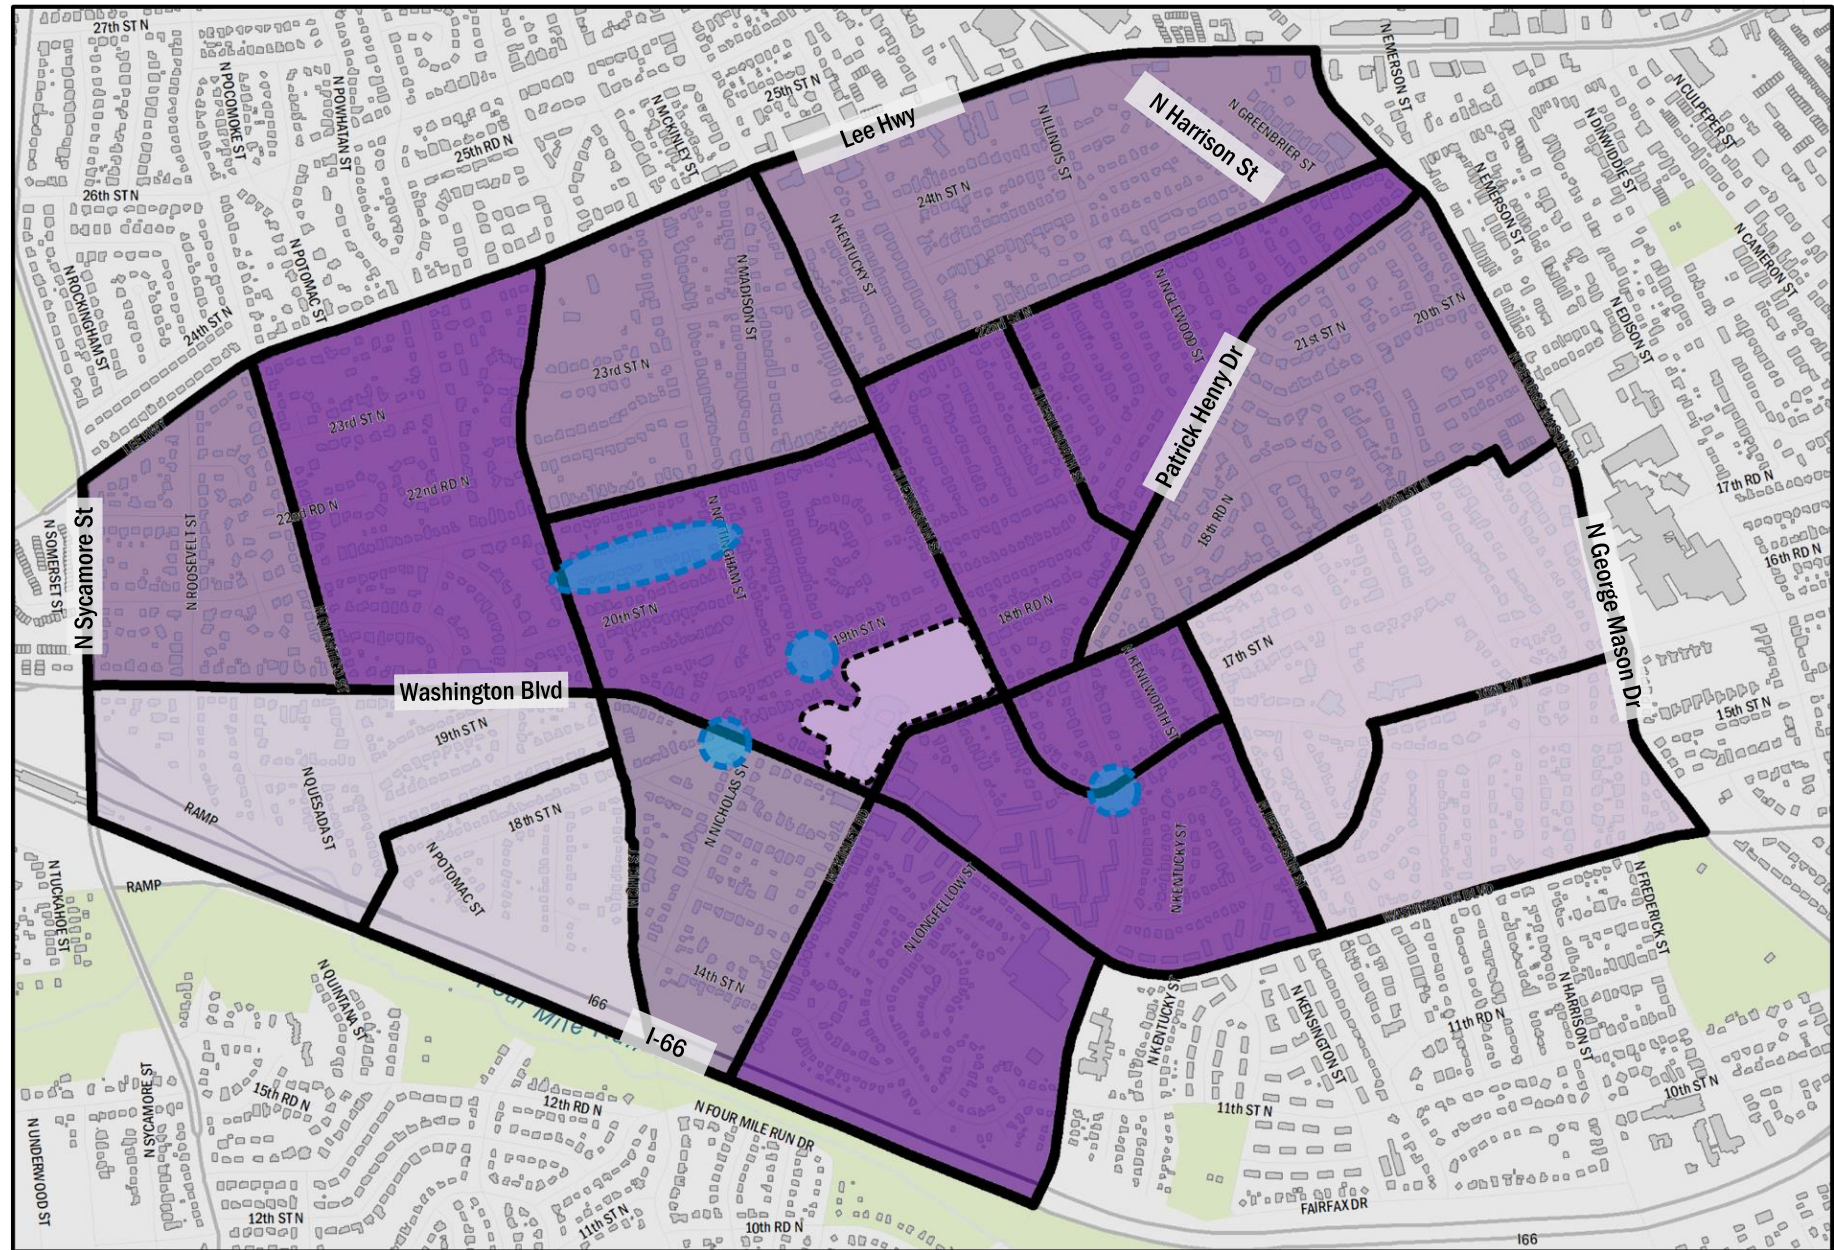

-  *Good sidewalk coverage and crossings*
-  *Some sidewalk gaps and/or difficult crossings*
-  *Significant sidewalk gaps and/or difficult crossings*

# EXAMPLE MITIGATIONS

A crossing guard (or similar solution) on Patrick Henry and filling in some sidewalks on 21<sup>st</sup> Street can help improve a few Planning Units adjacent to the site

# COUNTY PROJECTS

Multiple projects will improve pedestrian and bicycle network

Most will not have direct impact on the walk shed analysis results

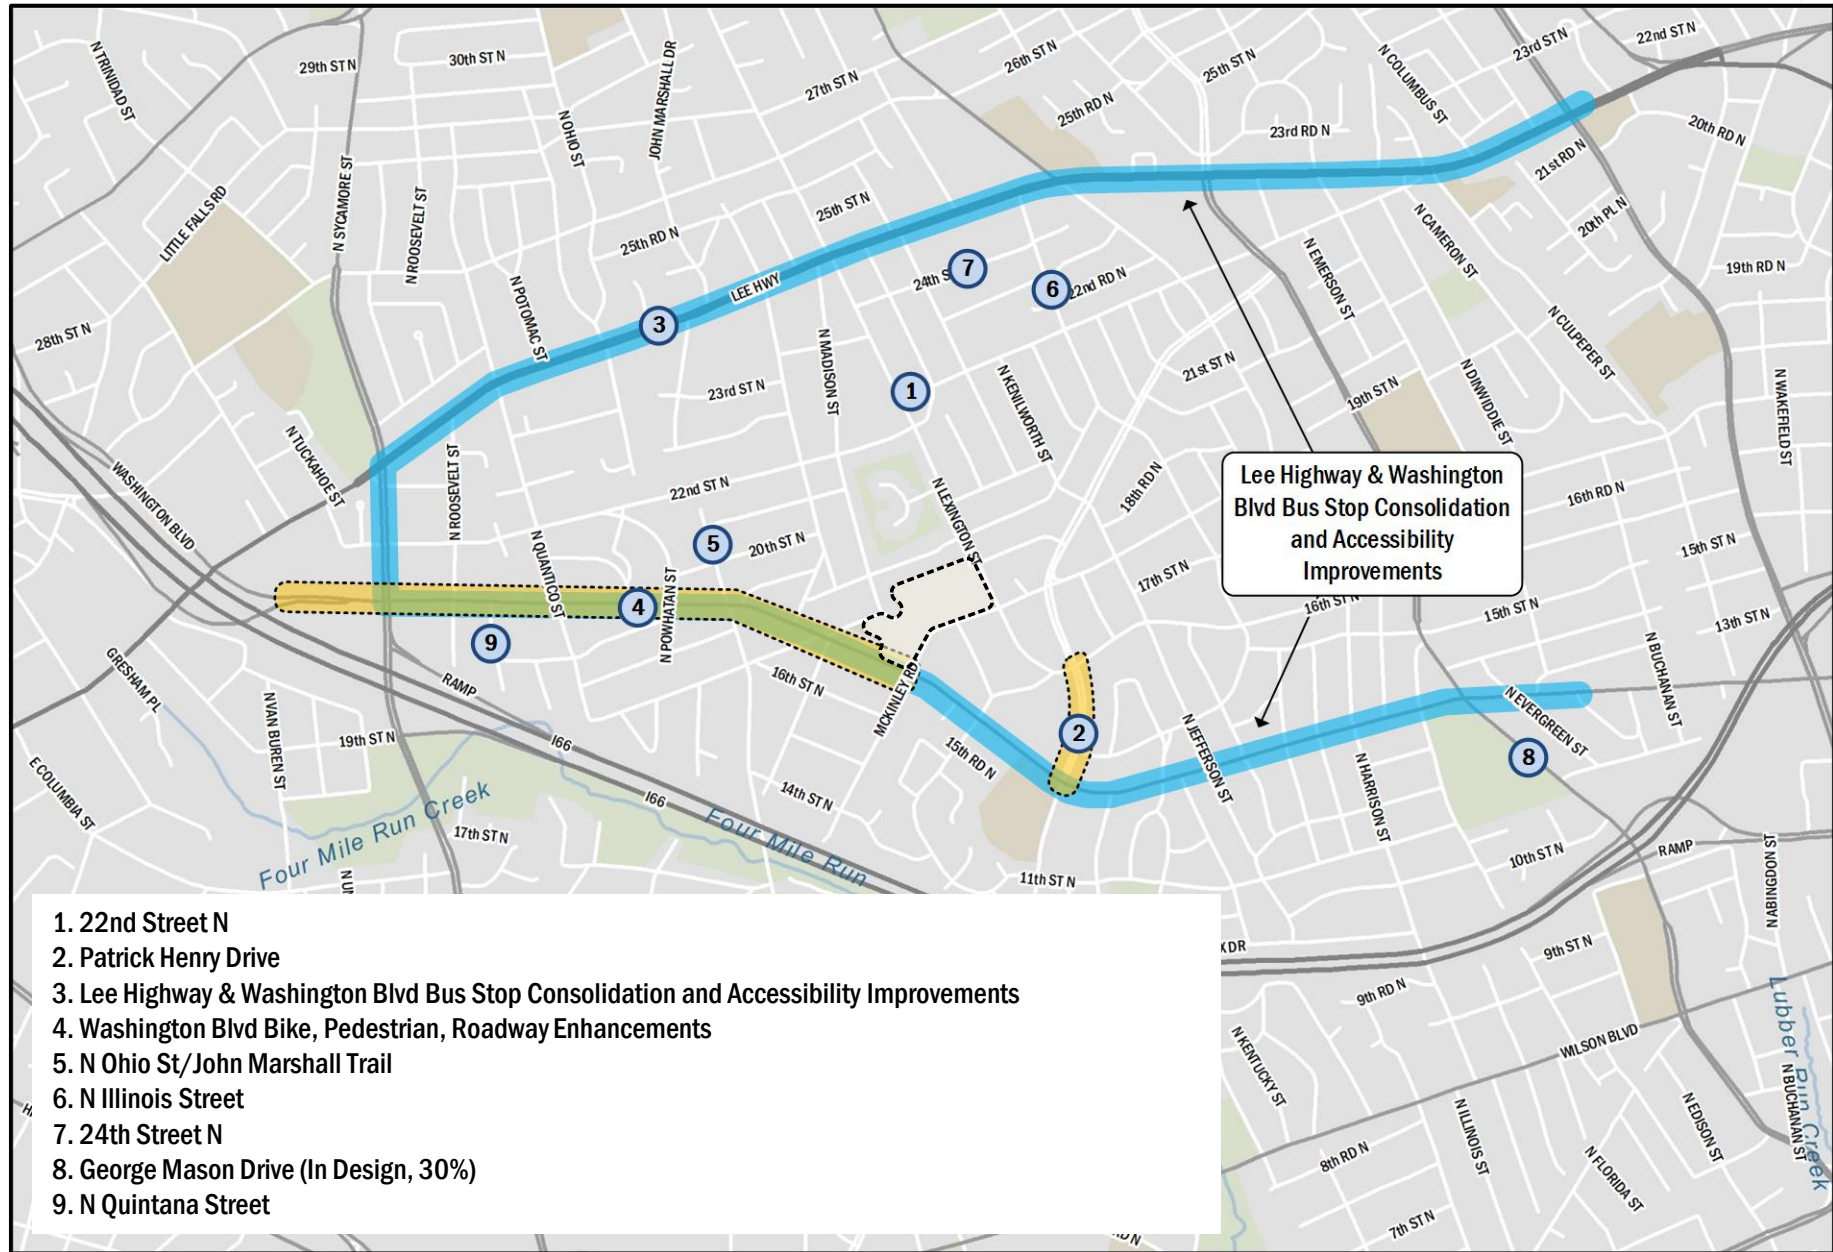

*Planned Improvement*

*Limits of Improvement*

*Lee Hwy and Washington Blvd Bus Stop Improvements*

# PEDESTRIAN THOUGHTS AND DISCUSSION

Improving quality of walking routes

- What is communities opinion of quality of walking in these neighborhoods?
- Need to review potential mitigations and look for others to improve routes

Impact of sidewalk gaps

- Should PUs with sidewalk gaps be in walk zone or not?
- Will parents be more likely to drive from these areas if they are in walk zone vs. bus zone?

Expandable Walk Zone

- Should any PUs rated highly be added to the walk zone?

APS Contact: Gladis Bourdouane, [gladis.bourdouane@apsva.us](mailto:gladis.bourdouane@apsva.us)

# PARKING DEMAND

# REQUIRED PARKING BY ZONING

**150** TOTAL  
REQUIRED  
SPACES

<p><b>116</b> SCHOOL SPOTS</p>	<p>{</p>	<p><b>19</b> VISITOR SPACES</p>	=	<p><b>725</b> STUDENTS</p>	/	<p><b>40</b> STUDENTS/SPACE</p>
		<p>+</p> <p><b>97</b> STAFF SPACES</p>	=	<p><b>725</b> STUDENTS</p>	/	<p><b>7.5</b> STUDENTS/SPACE</p>
<p><b>34</b> LIBRARY SPOTS</p>	<p>{</p>	<p><b>34</b> SPACES</p>	=	<p><b>16,750 SF</b> TOTAL AREA OF LIBRARY</p>	/	<p><b>500 SF</b> PER SPACE</p>

# SCHOOL PARKING DEMAND

Based on:

- 146 staff
- Staff driving mode split of 86% drive alone and 3% carpool
- Visitor data from APS Go! and prior APS ES reports

We are predicting:

- Peak staff parking demand: 120 spaces
- Peak visitor parking demand: 8 spaces
- Total: 128 spaces

With further TDM reductions, assuming the drive-alone percentage falls to 80%:

- The resulting staff demand is 111 spaces
- Total demand reduces to 119 spaces

# EXISTING PARKING

## Parking Demand Estimates (At Mid-Day)

Based on:

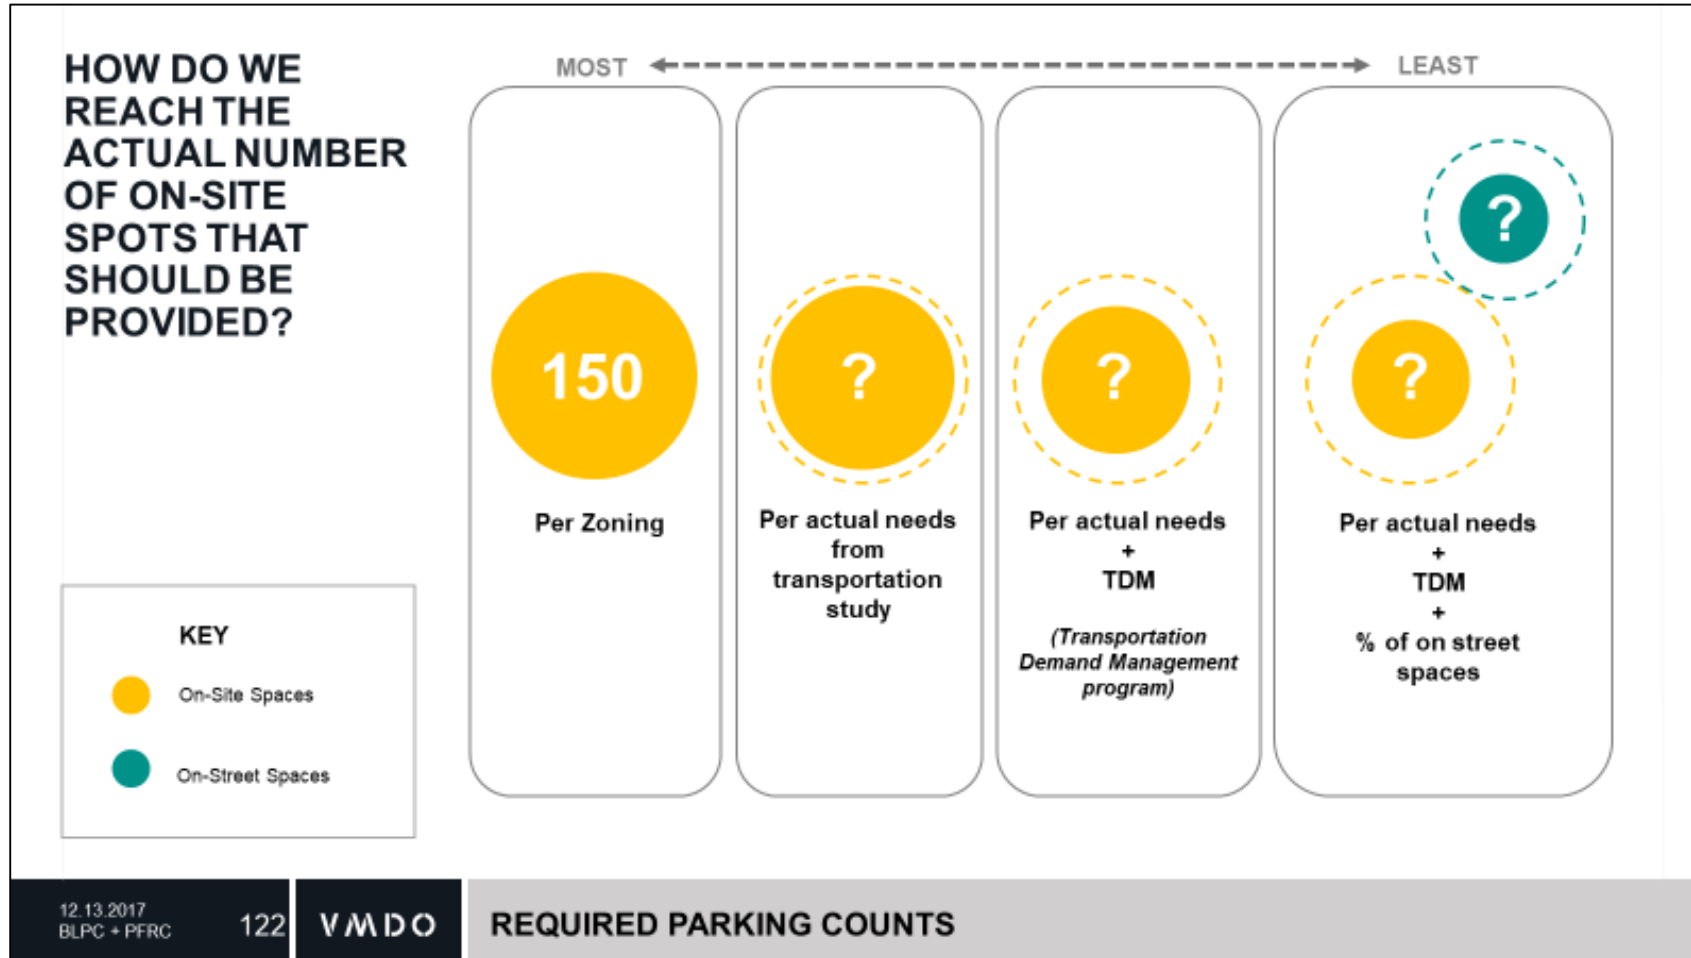

- Parking data collection
- Information from Library, Integration Station and Children's school about their staffing needs and travel patterns
- Information from the Library on their visitor demand

We estimate current parking to be:

- Library: 15 staff/volunteer, 30 patrons
- Integration Station & Children's School: 40 staff

# WHAT DO THESE ESTIMATES MEAN?

Remember that placeholder parking slide we've been using:

# HOW DO WE REACH THE ACTUAL NUMBER OF ON-SITE SPOTS THAT SHOULD BE PROVIDED?

**KEY**

-  On-Site Spaces
-  On-Street Spaces

# HOW DO WE REACH THE ACTUAL NUMBER OF ON-SITE SPOTS THAT SHOULD BE PROVIDED?

COMPARING ON-SITE PARKING PROVIDED FOR RECENT PROJECTS

	Fleet	Stratford	Wilson	Abingdon	McKinley	Discovery
Capacity	752 ES 1,086 MS	1,000 MS	775 MS/HS	725 ES	684 ES	630 ES 997 MS
Date of Use Permit Approval	22-Apr-17	18-Mar-17	25-Feb-17	19-Sep-15	20-Sep-14	21-Sep-13
Parking Spaces Required by Zoning	292	159	378	116	108	258
Parking Spaces Provided	250	134	100	98	56	209
Difference b/t Provided and Zoning (under)	(42)	(25)	(278)	(18)	(52)	(49)

Notes:

1. Data derived from Arlington County Government staff reports prepared for the Use Permit hearing.
2. Parking spaces provided includes spaces on APS property, ACG property, and dedicated off-site spaces. Excludes spaces on-street.

# EXISTING PARKING

## On site

- Northwest Lot: 46 spaces
- 18<sup>th</sup> Street Lot: 26 spaces
- Total: 72 spaces

## Existing demand

- Estimated at 85 spaces (45 for library, 40 for Integration Station and Children's School)
- Some use of on-street parking

## Predicted Demand with new ES

- Estimated at 164 spaces
- 92 more spaces than on-site
- Mitigated somewhat by library visitors use of on-street parking

# EXISTING SITE PARKING

Parking lots serve the Library and Pre-Ks

Peaks mid-day  
(58 of 72 spaces at 2pm)

Site Parking Occupancy (Northwest and 18th St Lots)

# COMMERCIAL PARKING

Combination of lots serving retail, including on and off-street

Peaks mid-day  
(186 of 249 spaces)

## Commercial Parking Occupancy

# NEIGHBORHOOD PARKING

On-street parking on residential streets

Peaks overnight

## Neighborhood Parking Occupancy

# EXISTING

Visual representation of the parking data at 2pm on typical weekday

Assigned parked cars to uses based on observations and demand estimates

Multiple use vehicles (e.g. retail + library) are not specifically identified

-  Pre-K
-  Library
-  Retail

# WITHOUT PRE-Ks

Existing demand without the 40 spaces used by Integration Station and Children's School

Assumes all library staff & volunteers park in NW lot, and visitors use 18<sup>th</sup> Street lot and on-street parking

Library parking:

- Using 34 of 72 on-site spaces
- 11 cars parked on street

 Pre-K

 Library

 Retail

# WITH NEW ES

Prior slide, but with 119 more vehicles parked for the new ES

On-Site (72 spaces)

- 34 library on-site
- 38 new ES on-site

Off-Site

- 11 library off-site
- 81 new ES off-site

 New ES

 Library

 Retail

# ON-SITE PARKING

81 new parking spaces takes up around 25,000 square feet (given an efficient lay-out)

To park all demand from new ES on site would decrease the amount of green-space and athletic fields

-  New ES
-  Library
-  Retail

# ON-STREET POTENTIAL

If on-street parking is used, the amount of area needed for on-street parking can decrease significantly.

This diagram shows a reduction from 81 to 46 spaces, assuming some on-street parking is used.

-  New ES
-  Library
-  Retail

# PARKING OPTIONS

# PARKING THOUGHTS & DISCUSSION POINTS

## Trade-offs

Greenspace/Athletic fields

versus use of On-street parking

versus Cost of building parking

## Use of on-street parking

Operational changes: Should the restrictions on on-street parking change to facilitate it's use? – e.g. make some unrestricted parking 2-hour only parking to deter staff parking

Policy changes: Can the library and new ES control where their employees park?

## Library & School

Can they share parking?

If not, how does that impact the supply?

# PARENT PICK-UP/DROP-OFF

# PICK-UP/DROP-OFF

## Based on:

- 725 students
- 38% percent driven by parent
- Observations at other ESs

## We are estimating:

- Morning Drop-off Queue:  
23 to 28 cars
- Evening Pick-up Queue:  
28 to 61 cars

## Why is there such a large range?

### Geometry

- How many cars can load/unload at once?
- Is there a pass-by lane?

### Operations

- Is the pick-up/drop-off facility staffed?

### Proximity to Alternatives

- Will parents be tempted to use an alternative?

# PARENT DROP-OFF/PICK-UP TYPES

## Tollbooth:

- Drop-off/Pick-up only at front
- Orderly queue in multiple lanes
- Requires staff at front of line
- Preferred for AM drop-off

## Tollbooth

## Airport:

- Many places for parents for drop-off/pick-up
- Includes a bypass/exit lane so parents can go out of order
- Requires long stretch of sidewalk and multiple staff
- Preferred for PM pick-up

## Airport

Dropping-off/Picking-off

In queue or exiting system

# QUEUE LENGTH FACTORS

Examples of different facilities

# QUEUES

Aim for 30 cars of queueing and use geometry and operational solutions to keep queue within 30

What 30 cars of queueing looks like

# QUEUES

Aim for 30 cars of queueing and use geometry and operational solutions to keep queue within 30

What 30 cars of queueing looks like

# BLPC / PFRC DISCUSSION

# PUBLIC COMMENTS

# NEXT STEPS & ADJORN

## NEXT STEPS

- Process and analyze traffic data
- Assemble information and findings for the March transportation meeting
- Respond to comments/feedback from transportation meetings
- Assemble draft transportation report
- Upcoming Meetings:
  - March 8th – Information Item to School Board
  - March 21st – BLPC/PFRC Transportation Meeting
  - March 22<sup>nd</sup> – Action Item to School Board
  - April TBD – Schematic Design kick-off

# ADJOURN

- Provide feedback to APS via project email: [reed.info@apsva.us](mailto:reed.info@apsva.us)
- For further information, please contact:
