

2018 Summer School Pilot Evaluation Metrics

- How full are buses both in absolute terms and relative to the number of eligible students per route? *Will do a few counts throughout the summer.*
- How long is the bus ride for each route (and the number of stops on each route)?
- At what time does the bus arrive at the first stop relative to the bell time?
- How many complaints did we get about the pilot? *Categorize*
- How are students getting to the bus stop (*Parent/student survey*)
- If they were eligible for the bus, but did not use it – why not and what other mode did they use. (*Parent/student survey*)

Send out a short survey to parents/students at end of pilot and include a couple questions about their perceptions of the pilot – what did they like/what challenges did they face/would it work for them in the school year.
