

APS Canvas

for parents supporting students using iPads during learning from home

This resource shows:

- How students log in to the Canvas Student App
- Video Overview of the Canvas Student App
- Canvas Guides for Settings and Dashboard
- Canvas Guides for Course Features
- Canvas Guides for Assignments
- Accessibility Tools

Click this link to see all Canvas Student App Guides for iOS

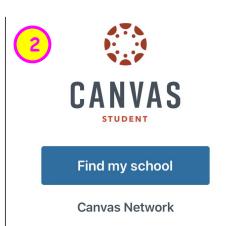

Logging in to the Canvas Student App

APS student iPads already have the Canvas Student App installed. This presentation shows how to login and use the Student Canvas App. Some students and teachers also like to access Canvas via the Safari browser on the iPad. For information on the browser experience, please refer to LINK <u>LAPTOP</u> PRESENTATION.

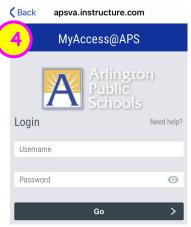

On the student iPad, locate the **Canvas Student App**. You can pull down from the Home Screen and search Canvas. Click on the App icon.

On this screen, click the **Find my school** button. NOTE: Do **not** type your School name.

In the "Find your school or district" field, start typing "Arlington Public Schools". Two options appear. Select the one for Students/Teachers.

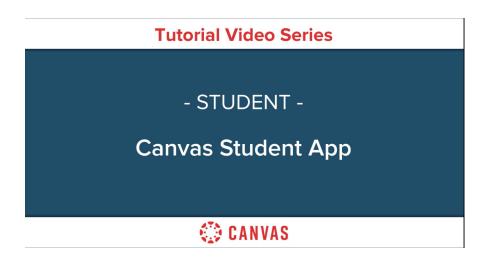

On this screen, students enter their **Student ID** and **Password** and click the **Go** button.

Video: Overview of Canvas Student App

Click the picture which is a link to a video produced by Canvas with an overview of the **Canvas Student App**.

The video begins with a generic login process, so please forward the video to :49.

Links to Canvas Student App Guides (iOS)

- Settings and Dashboard

The Canvas Student app helps students access their courses. The app displays your profile, Calendar, To-Do items, Notifications, and Messages, as well as functionality to access and complete a course.

Click the text links below to learn more.

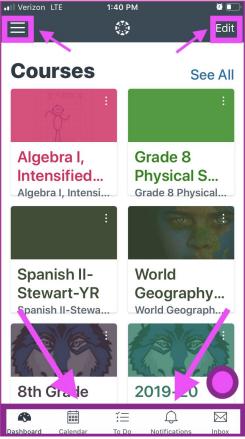

How do I:

- use the Student app?
- change Student app settings?

In the Student app, how do I:

- view the Calendar?
- send a message?
- reply to a message in the Conversations Inbox?
- view Notifications?
- view the To-Do List?

Sample Dashboard

- Course Features

The app defaults to the **Dashboard** and displays your favorite courses. To open a course, tap the course name. Several APS teachers have a **Home Page** with links to Modules.

Click the text links below to learn more about Course Features.

How do I:

- view Courses and Groups?
- view Announcements?
- view Conferences?
- view Discussions?
- reply to a discussion?
- use the Rich Content Editor?
- view grades?
- view Modules?
- take a quiz?
- view quiz results?

Sample Course

Assignments

Teachers may assign Assignments to be submitted via Canvas. There are many types of Assignments. The links below are to Student Canvas App Guides, for iOS, to help you with submitting specific types of Assignments, and how to access feedback, if provided.

Click the text links below to learn more about Assignments.

How do I:

- view Assignments?
- make a comment about an assignment?
- view a rubric for my assignment?
- upload a file as an assignment submission?
- submit a media file as an assignment submission?
- enter a website URL as an assignment submission?
- submit a text entry assignment?
- submit a PDF assignment with annotations?
- submit an assignment from a third-party app?
- verify my assignments were submitted?
- resubmit an assignment?
- add annotations to a submission?
- view assignment comments from my instructor?

Accessibility Tools

There are various accessibility tools built into programs and devices.

Within Canvas

- Accessibility within Canvas (browser)
- Canvas Pages have <u>Immersive Reader</u> (not in Announcements, Discussions, Assignments, Quizzes, etc). We tested it in Safari on the iPad and it works in the browser (be sure to close the banner asking you to open the Canvas Student App in order to see the controls). Immersive Reader is not available on the Student App, but for read-aloud, students can use the built-in, text-to-speech iPad accessibility feature (Settings > Accessibility > Speech > turn on Speech Selection. Then select Text and choose Speak).

Built in to iOS Devices

- Accessibility shortcut for iPad/iPhone
- Accessibility for iPad/iPhone the Ultimate Guide
